

ROTARY & BONNET SHAMPOO

Bone Dry™

Encapsulating Cleaner

Special crystalizing polymers bind and lift soils to the surface for removal by vacuuming then leave a dry protective coating on the fibers to prevent resoiling and wicking. Dirt will not stick to the treated fibers.

CR-30 Bonnet Shampoo™

Concentrated Bonnet Cleaner

A concentrated shampoo for cleaning both carpet and most wet cleanable upholstery. Unique "no residue" formula dries to a crystal for easy vacuum removal. Can be used on carpets, rugs, upholstery, and automotive interiors.

Rotary 128 Shampoo™

Carpet Shampoo

A high foaming, fast drying carpet shampoo that dissolves dirt on contact and suspends it in the foam. Removal of the foam leaves the carpet or fabric with a bright, clean and fresh appearance. Contains grease cutters to effectively remove grease, dirt, and oil from carpets, rugs, upholstery and automotive interiors. No residue formula dries to a crystal for easy vacuum removal.

Spin Clean Plus™

Bonnet Shampoo

Spin Clean Plus is a low foam, high solvent shampoo for use with most low moisture systems. Produces very low foam that dries quickly for easy removal. High solvent content speeds drying and effectively removes grease, dirt and oil from carpets and rugs. Not for use in dry foam extractors.

ORIENTAL RUG AND NATURAL FIBERS

Fringe Bleach™

An easy to use, color safe bleach for the fringe on oriental and decorative rugs. Mix with water to make a paste then brush into the fringe. Allow to dwell then rinse with warm water.

Oriental Rug Shampoo™

A high foaming shampoo specifically designed for the natural wool, cotton and jute fibers found in oriental rugs. Gentle cleaning agents delicately surround the soil and lift it to the surface. When the rug dries, normal vacuuming will remove the soils.

Haitian Cotton Shampoo™

Delicate Fabric Shampoo

This is an effective cleaner for use on all delicate fabrics including Haitian Cotton, suspected dye bleeders or any natural fiber likely to brown. Gently removes dirt and leaves surfaces clean and smelling fresh. Slightly acid pH helps prevent browning and dye bleed. Can be used with a brush, sponge, or foaming applicator.

UPHOLSTERY SPECIALTIES

TopCare® Upholstery Prespray™

A concentrated blend of detergents, solvents, and builders designed to remove a variety of soils and stains. Removes hair and skin oils with its power packed degreasing action. It extracts surface dirt while brightening the fabric. Special self-neutralizing formula quickly returns to neutral pH to minimize dye bleed and browning. Can be used with a brush or spray applicator. Follow with extraction cleaner, shampoo or just acid rinse.

TopCare® Upholstery Cleaner™

Upholstery Cleaner is formulated to safely clean all wet cleanable upholstery using either extraction or hand cleaning techniques. Neutral pH minimizes chance of browning or dye bleed. As always, test for compatibility before using.

Lift Off

Neutral pH Upholstery Cleaner

Solventized upholstery cleaner and booster that is fast drying and excellent on oily residues.

CERAMIC TILE & GROUT

Stone Impregnator 407™

Penetrating Masonry Sealer

Stone Impregnator 407 is a water based, fluoro-chemical treatment that penetrates into grout and porous stone preventing oil and water based soils from penetrating the surface. By keeping the stain and soil on the surface, this product protects the substrate and makes it easier to clean. This product will not alter grout, cement or stones' natural appearance and does not require special maintenance.

Tile Whiz™

Tile and Grout Cleaner

A heavy duty, high alkaline, tile cleaner and degreaser concentrate. This water-based cleaner is extremely effective in removing grease, oil and soils from glazed and unglazed ceramic tile, saltillo and quarry tile as well as concrete, brick, and porcelain.

Tile and Grout Restorer™

Non-etching Acidic Restoration Cleaner

This acid based cleaner is built with new technology in surfactants and other cleaning agents to rapidly clean and brighten tile and grout. If the tile and grout is heavily encrusted with soil or has had floor finish applied, it should first be stripped and cleaned. After rinsing the surface, apply Tile and Grout Restorer directly to the surface. Allow to dwell then rinse with clear water.

1 Shot™

A powerful blend of ingredients that can cut through dirt and soil and brighten dingy grout in one easy step. Non-Acid and non-etching **1 SHOT** is safe for all natural stones including limestone, marble, travertine, granite and slate as well as ceramic and porcelain tile, quarry tile and saltillo tile.

ODOR CONTROL

We offer a complete line of water based deodorants, smoke odor counteractants and solvent based thermal fogging odor control agents.

• **CARPET DYES**

A full line of dyes, spot dyes and dye related chemicals are available.
